AIRCRAFT CERTIFICATION

OVERALL CLASSIFICATION: UNCLASSIFIED

*Semper
paratus*

SITUATION

07 Sep- 09:00 L

Weather: Scattered Clouds@ 11kft

- The Ethiopian Air Force has upgraded their L-39C with weapon packages. Their pilots are currently going through their final training courses but lack qualification. An Air Force general is eager to certify the jets so that they can start using them as soon as the pilots are ready. They have contacted us, a private contractor, to fly the certification flight.
 - The General and his staff are at a viewing stand to the south of the range and waiting for the demonstration to begin.

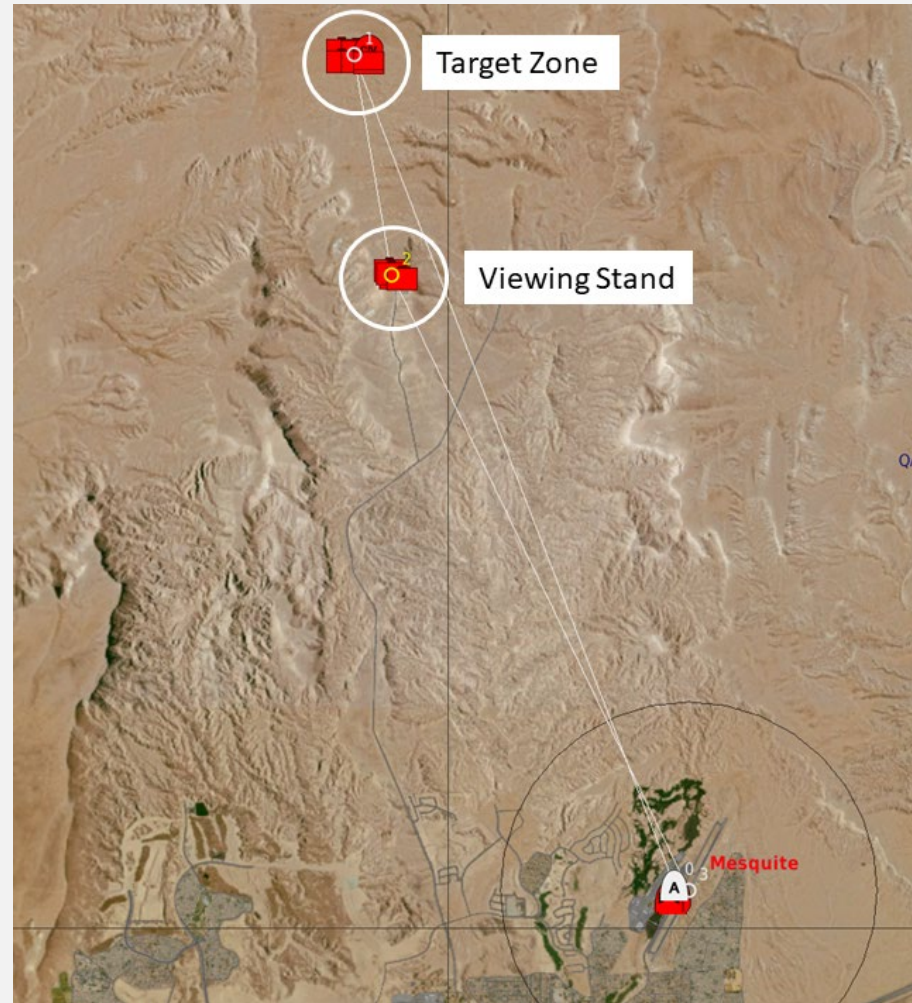

MISSION

Commanders Intent: Acceptance of aircraft platform

- Brief
 - Enfield flight will conduct qualification flight to validate performance of Ethiopian L-39C aircraft to conduct air-to-ground attacks.
 - Abide by range safety procedures at all times.
- Targets
 - 4x Tents
- Friendly Assets
 - Ground party with general officers ~1.3 NM from target area.

ROUTE

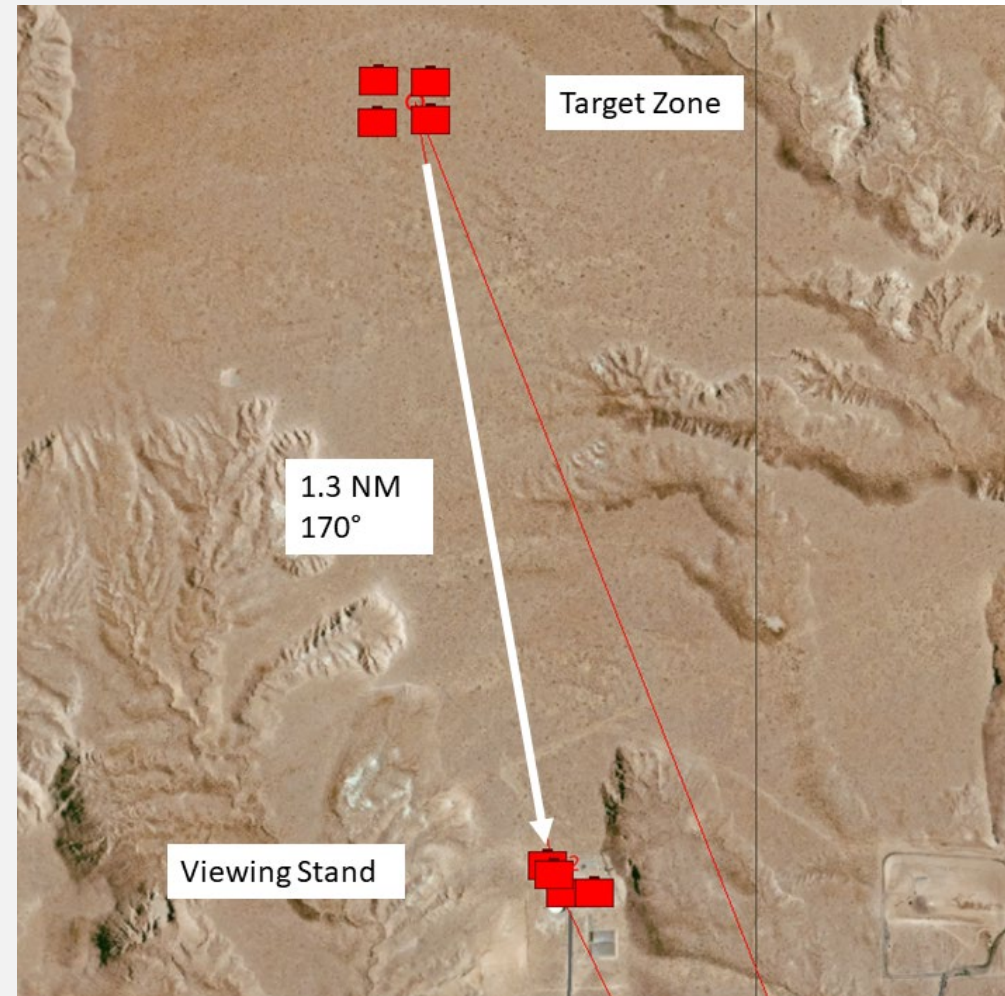

- Enfield 1-1 depart via RWY 19 @ Mesquite AFD and make your way NW towards the proving ground.
- Conduct the weapon qualification in the target zone; follow range safety etiquette.
- Egress back to Mesquite once qualification has been completed.

TARGET

Primary: Tents

- Target area is located ~1.3 NM from the target area. Avoid strikes within 1 NM of viewing stand.
 - Make attack runs south to north only.
- Employ rockets against the tents located in the target zone.
 - Smoke will be used to mark the targets.
- Be prepared for ad hoc requests from the General attending the qualification.
