

# DCS Mirage F1 Voice Attack by Bailey

## Intro

Hello and welcome to Bailey's VoiceAttack Profile for the DCS Mirage F1! Thank you for taking a look. This VoiceAttack Profile (VAP) uses keybinds to make your voice commands into cockpit actions. Take your time, learn the aircraft, and use the voice commands that you want to use to supplement how you fly. With use, this VAP will be second nature. Use the commands that feel most comfortable to you. You can use VA as much or as little as you like. You can even add more commands if you like. Good luck!

## How to Install

1. Extract the file you downloaded with your personal flavor of zip software (winzip, winrar, etc.).
2. Open Voice Attack (full version) and Import the file called 'Bailey Mirage F1 vX.vap'. The 'X' denotes the version number. The higher the number, the more recent the version.
3. Start DCS and import the keybinds:
  - a. Go to the Control Options menu
  - b. Select "Mirage F1CE" from the dropdown
  - c. Single click any entry in the "Keyboard" column
  - d. Click the "Load Profile" button along the top of the screen
  - e. Find and select the "Mirage F1CE Keyboard.diff.lua" file. You may have to check the "Folder Browser" button to easily navigate to it. Click OK.
4. Yay! You did it! You are ready to fly read the rest of the readme!

## How to understand VoiceAttack and this VA Profile

To get the full benefit and understanding of this VAP, you will need to know how commands are made and written in VoiceAttack. Please search for and read the "Dynamic command sections" in the VoiceAttack program readme. Sure, you can use this profile without having read it, but you will get so much more out of it if you do! From this point forward, I will assume you have read the page or two of information about dynamic command sections. If you want to use this VAP with another VAP, take a look at "Global Profiles" in the readme too. There are times when a switch or button in DCS may not have discrete ON or OFF keybinds. In these cases, use common sense when you say, "Kneeboard toggle", "Kneeboard Off", or "Kneeboard On", for example. This VA profile does not directly track the state of your switches (or anything for that matter) in DCS. Please use common sense. You need the Paid version of Voice Attack for this profile. Please train your speech recognition at least 3 times for best results when using this profile.

## Crew Chief Commands

These commands can be used on the ground while at a friendly airport:

Chief, request rearm and refuel	Chief, start the bird	Chief, let's get this party started
---------------------------------	-----------------------	-------------------------------------

## DCS Radio Commands

Use these commands to bring up the comms menu. Say "Comms" to bring up the comms menu. Then say any F-key to start navigating:

Comms; Ground comms	Comms atc	Comms flight
Comms awacs	Comms F10	Comms check
[F1..F12]		

## Aircraft Radio Commands

Use these commands to manipulate the radios. Due to how the module is coded, all radio commands are *relative* to the currently selected channel. For example, you say "UHF down 2" while the UHF channel is at 7, then the result will be the UHF radio being set to channel 5.

UHF [decrease;down;minus] [1..19]  
UHF [increase;up;plus] [1..19]  
VUHF [decrease;down;minus] [1..19]  
VUHF [increase;up;plus] [1..19]  
Nav [decrease;down;minus] [0..9] [0..20]  
Nav [increase;up;plus] [0..9] [0..20]  
Tacan [decrease;down;minus] [0..11] [0..9]  
Tacan [increase;up;plus] [0..11] [0..9]

## Kneeboard Commands

Use these commands to, well, command the kneeboard. Glances are 3 seconds:

kneeboard [Show; hide; toggle;]  
kneeboard [next; previous] [page;]  
kneeboard mark  
kneeboard glance  
kneeboard where are we [glance;]

## Weapon Commands

Use these commands to manage your weapons. The “give me” commands are designed to get you ready to fire your desired weapon. All you will have to remember to do is pull the trigger! Remember, all of these commands start with:

**Give me ...**

bombs	Air to air guns	Air to ground guns
chaff	Chaff and flare	flares
Fuselage bombs	Fuselage missiles	Inboard bombs
Inboard rockets	Outboard bombs	Outboard rockets
Wing bombs	Wing missiles	Wing missiles [left;right]
Wingtip missiles [left;right]		

## Miscellaneous Commands

These commands have been made for your convenience. Here you can also find inspiration for commands of your own!

Gear [up;down]	Flaps [down;full;up;retract]	Clean up
Prepare for landing	Autopilot engage all	Autopilot [engage; disengage]
Autopilot approach mode	Autopilot runway mode	Autopilot altitude mode
Autopilot heading mode	Master arm [on;off]	Briefing [show;hide]
Chute [open; release]	Hud approach mode	Landing light [off, on, taxi]
Master [caution;warning] silence	Countermeasure program [next;previous]	Parking brake [release;off;on; set]
Radar [scale;range] [60;35;15;7;up;down]	Nav mode [additional;polar;vector]	Nav mode normal
Press spacebar to continue	HSI [AR;TT;TE;VT] Mode	Radar [off;on;transmit;silent]
Nose wheel gain toggle		

## Feedback Commands

Use these commands when you want feedback on your spoken commands. The settings are saved to the profile.

command confirmation beep [on;off]

command speech repeater [on;off]

## Outro

That's about it for now. For those savvy Voice Attackers, there are some treats for you in the .VAP. For those who aren't as savvy, just use what you got, and you'll be fine! Thank you for downloading my VoiceAttack profile and I am sure we all look forward to what DCS will have in store for us! Feel free to contact me on Discord (Bailey#6230). Remember that comments, questions, critiques, and requests are always welcome! If you need assistance with something, please take the time to troubleshoot as much as you can using this readme and the Voice Attack Help Readme. I am glad to help, but the time I have to do so is limited. Help me help you and gather as much info as you can. Images, screenshots, and short videos can help portray the issue. I look forward to being able to update this VAP alongside the development of the DCS Mirage F1 as much as I can. Enjoy!

~Bailey

07AUG2021

DCS Version: 2.7.16.28157

- If you are feeling charitable, please feel free to donate. All donations go to paying for DCS modules and development to support even more free DCS mods, just like this one! Thank you to all who have donated to make these Voice Attack profiles and mods possible.
