

Introduction

Hello and welcome to DiCE: DCS Integrated Countermeasure Editor. DiCE allows you to use the DCS Special Options menu to change and modify the flare and chaff countermeasure programs of various DCS aircraft, for example the F-18C, F-16C, A-10C, A-10C2, AV-8B, and M2000C. DiCE is a solution to DCS's not yet implemented DTC (Data Cartridge) Countermeasure functions.

Install Instructions

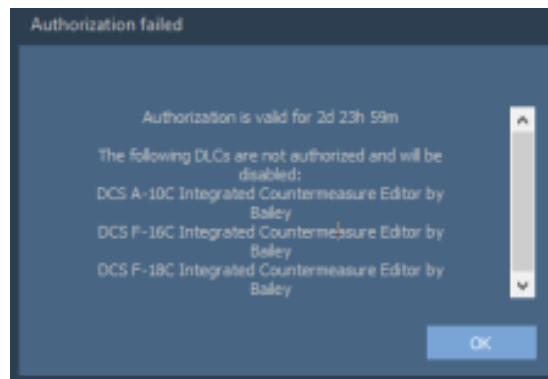

1. Download DiCE from the ED Userfiles:
<https://www.digitalcombatsimulator.com/en/files/3312680/>
2. Unzip the downloaded file with Winrar, Winzip, or another program of your choice.
3. Drag the "Config", "Mods", and "Scripts" folders into your
`C:\Users\<Username>\Saved Games\DCS` folder to merge them.

4. Install is now complete. Launch DCS and Enjoy!

Common or Possible Issues

- If you start DCS and see an image like this:

You have installed DiCE in the wrong location. Remove all DiCE files and take a careful look at Install Instructions one more time. DiCE should be installed in your **DCS Saved Games** location.

- If **your aircraft does not see changes to its countermeasure programs**, there could be many reasons why. Try the old-school "turn it off, then back on again" trick. If that does not work, then delete all DiCE files and re-install using this README. If that does not work, try running DCS in Admin Mode. Please collect and remember as many details as possible, even if they seem trivial. Then contact me on Discord or on the DCS forums. I'll do what I can to help diagnose the issue so that you can enjoy DiCE.

- You can use DiCE while in a Single player or Multiplayer mission. Make your changes via the Special Options menu, respawn, and you will have the new countermeasure profiles loaded in your aircraft. Remember to view the Escape menu at least once during this process. That is what triggers the update.

- Version 6 has an option to disable DiCE. Use this before joining multiplayer servers that have Integrity Check enabled. This setting is located on the DiCE M-2000C Special Options page.

Acknowledgments and Credits

Thanks to all who volunteered to demo and test DiCE. Your bravery will never be forgotten.

Thank you to the many people on Discord who helped me with understanding DCS, lua, C#, and other topics that I could not grasp.

Thank you to Ciribob of DCS-SRS.

Thank you TAIPAN_ for the patches.

Thank you to Eagle Dynamics.

Thank you to everyone who has spread the word about my mods and addons for DCS.

-Please join us in the Discord server: <https://discord.gg/PbYgC5e>.

-Check out DiCE on the DCS forums here:

<https://forums.eagle.ru/topic/247605-dice-dcs-integrated-countermeasure-editor-by-bailey/>

-Check out my other Mods, Utilities, and VoiceAttack profiles here:

https://www.digitalcombatsimulator.com/en/files/?PER_PAGE=100&CREATED_BY=asherao

-Please feel free to donate. All donations go back into DCS to create more free mods, just like this one: <https://www.paypal.com/paypalme/asherao>

Feel free to contact me on Discord (Bailey#6230) or the ED forums (Bailey). Remember that comments, questions, critiques, and requests are always welcome! Enjoy!

~Bailey

May2023

Version Notes:

v1

-Initial Release

-DiCE F-18C enabled

-DiCE F-16C enabled

v2

-DiCE A-10C and A-10C2 enabled (one Special Menu for both)

v2.1

-Corrected some F-16C values

v2.2

-DiCE now opens minimized (requested feature)

-Fixed a F-16 special options menu showing all zeros (added two parenthesis)

v3

-DiCE AV-8B enabled

v4

-DiCE M2000C enabled

-Adjusted some Gui stuff

v4.1

- Updated readme (read readme if you have DCS installed in Program Files)
- Took away "DiCE is already running" popup

v4.11

- Fixed DiCE errors in dcs.log file

v4.2

- DiCE now makes CMS changes on startup too (thanks Bear21)

v4.3

- Updated F-16C for DCS v2.7.7.15038

v5.0

- Removed use of exe (Requires removing ALL DiCE files before installing v5, to include `Saved Games/DCS/Scripts/Hooks/DiCE-DCS-Integrated-Countermeasure-Editor.lua`)
- Updated F18C
- Updated F16C
- Adjusted Special Options > DiCE GUI

v5.1

- TAIPAN_ fixed F-16 programs not applying saved programs, manual and auto (only program 1 was working)
- TAIPAN_ fixed AV8B Chaff only program not saving properly

v6

- Added the option to disable DiCE (Integrity Check Pass Mode)
- Minor code cleanup

v6.01

- F16C page is now scrollable to assist with smaller game resolutions
- New troubleshooting tip: run DCS as Admin
