

# DCS UH-1H Huey - Voice Attack Profile

By Bailey

Hey! Thanks for downloading. I have to thank Pfeil, randolf, and others from the VoiceAttack Discord for helping me and putting up with my sometimes ridiculous questions.

**\*\*For this Voice Attack Profile to work you **MUST** bind the correct keys for the DCS Huey. Don't worry, more on that later.**

(You don't actually have to read this if you know what is going on with VoiceAttack, but it will help. A lot.)

## Overview

Did you know the Fortunate Son had a brother?! Now you do and you have been reunited thanks to this Voice Attack Profile for the DCS Huey. Voice command your Copilot to do the things that, well, he is supposed to do! Tune the radios, take the controls, set up weapons. Lift that Purple Haze and give this VoiceAttack profile a try!

This Voice Attack Profile will enable you to command all four radios in the DCS Huey

You can:

- Tune a specific frequency
- Tune the tower of any airfield on Caucus or Persian Gulf
- Pass the controls to the copilot (and take them back)
- Have the copilot set up the weapons

## Install Instructions

1. Extract the ZIP file that you downloaded.
2. Start VoiceAttack and IMPORT the profile 'Bailey Huey V1.00.vap' from the extracted ZIP file.

## How to use it

\*Every time you get in a new DCS Huey, reset the radios by saying "Reset Huey Frequencies".

## Radio Voice Commands

Remember to "Reset Huey Frequencies" every time you spawn in or respawn! Make sure that you have not changed the default frequencies that the radios spawn with. If for some reason you manually adjust the frequencies you can go back to using voice commands by "re-aligning" the radios. Here is how you do that:

1. Tune the VHF HF Radio to 30.00
2. Tune the NAV/VOR radio to 113.00
3. Tune the VHF Radio to 130.000
4. Tune the UHF Radio to 300.00
5. Say "Quick Reset Frequencies"
6. Done!

When you want the copilot to tune a frequency you simply say one of the below:

"Copilot frequency [xx] point [xx]"

"Tune frequency [xx] point [xx]"

Replace the [xx] with the number of your desire, for example: "Copilot frequency 369 point 55"

If you would like the copilot to tune an Airport Tower, simply say:

"Tune [yy] tower"

Replace [yy] with the airport of your choice, for example: "Tune Anapa Tower"

## Other helpful Commands

Take a look at the commands available to you, you copilot, and even your gunners:

"Copilot Sight"

"Pilot Sight"

"Head Tracking Aim Toggle"

"Flare Arm Toggle"

"Give Me Guns"

"Give Me Rockets"

"Intercom Mode 1/2/3/4"

"Intercom Mode Intercom/Interphone"

"Intercom Mode Private"

"Left Gunner"

"Right Gunner"

"Master Arm On/Off"

"Night Vision Goggles"

"Open/Close All The Doors"

"Copilot Seat"

"Pilot Seat"

"ROE"

"ROE Copilot/Left Gunner/Right Gunner"

"Rocket Pair Decrease/Increase"

"You have the controls"

"I have the controls"

"My Controls"

If you are feeling brave, feel free to open up the Profile and see what is in there. Also feel free to adjust, change, or add things!

## Customization and Keybinds

Take a look at the Keyboard.html file. Make sure you don't miss any. Most should already be assigned.

## Outro

Version notes:

V1.00:

Copilot radio tuning

Copilot weapon setup

Copilot controls

Caucus and PG towers are tunable

## Contact Me

Message me on Discord: Bailey#6230

Come on over to the Hoggit Discord! <http://discord.gg/hoggit>

Let me know if there are any mistakes, anywhere.

I really value any input you may have on this project. Anything from "It doesn't work", to "The voices are too loud in my head.", to "I would like X feature!". Oh, and a "Thanks!" will do too!

Feel free to change anything about this VoiceAttack Profile that you want. Also, feel free to mix and match this profile to other profiles that you have. I have covered some unique things, but the guy in the back can't raise the gear! Think you have a change that will benefit others? Let me know and I may incorporate it in the next update.

\*I don't use VAICOM PRO. For those that do, I'd still appreciate your input!

I hope we can make this VoiceAttack profile better as time goes on. Tell your friends!

The download for this VoiceAttack Profile is located here:
