

## MISSION 2.1.A

## MISSION

Today's mission will be an on-call close air support mission to support Georgian and NATO ground force in retaking the village of Iskari. We will likely be tasked with destroying a fortified bunker on the west side of the town itself, so the jets are loaded with 4 MK-83s each.

For several days, separatist rebels, backed by Russian Special Forces and GRU operatives have been in control of several Georgian villages in the northern part of the country. The operation to retake this hamlets begins today, as friendly ground forces begin to sweep West to East with the goal of routing the insurgents.

## THREATS

### AAA/SAM

The Russians have clandestinely re-enforced rebel ground forces in and around Abkhazia, South Ossetia. Air Defences include ZSU-23 emplacements throughout Northern Georgia, as well as mobile ZSU-23 Shilkas and SA-8 Gecko IR mobile SAMs. These may in fact be manned by active duty Russian Armed Forces and/or GRU/FSB personnel, along with special Russian “volunteers”.

There is now an active SA-6 site operating at Gudauta airfield, built by the Russians and manned by Russian “volunteers”, mostly either ex-military or rich playboy types who are looking for adventure.

MANPADs are expected anywhere in the AO, including on the Georgian side of the border.

### AIRBORNE THREATS

The Russian Air Force has currently been operating an almost 24 hour a day CAP just north of the border. Do not cross the Georgian/Russian border at any time!

NATO fighters are cleared to fire on any hostile aircraft **within** Georgian airspace that is either,

- Declared hostile by MAGIC
- Has fired on NATO aircraft or Ground Forces

Weather in the target area is forecast to be generally VFR, clear skies but visibility dropping down to 4-6 miles in light mist or fog. Winds are going to be light out of the east.

The Jetstream is far north and will not be a factor. Contrail altitude is forecast to be at 17,000msl.

## NOTES ABOUT COMMS

Easy communications are disabled. Ensure your radios are set to the correct frequencies at the appropriate times. Do not use the default ATC comm menus in the game.

There are a few instances in the mission where you will need to use the Radio Menu / F10 other menu to make a choice.

You **CAN** use the standard radio menu items to:

- Contact Magic (AWACS) 234.8
- Contact Texaco 11 (air refuelling tanker) 328.

Besides the examples above, you will not need to use the radio menu to contact ATC or other mission elements. These will happen at certain times or when you pass certain waypoints. Make sure you have the correct frequencies active in your radios, and you use the correct radio transmit button!
