

Day 1 – ACM Training AGGRESSOR

BACKGROUND

It's your turn as an Aggressor!

That means no tanker or AWACS will be available to support you.

You have to rely on your radar and not waste too much fuel if you want to RTB at Nellis.

Today, with Springfield 1 (F-15E 335th Fighter Squadron) you will engage an air battle over FEBA with AIM-9 Sidewinders.

F-15E is a ground pounding aircraft but it's F15 DNA makes it dangerous to approach in combat.

BRIEFING

Takeoff from Nellis at 21:35(ZULU time).

This time you are using Red forces corridor, so check in with Showtime over Range 74 (WP 5)

Once in contact with Showtime wait Springfield 1 to be on station and declare READY when you are.

The dogfight will take place over FEBA (WP6), you can enter the fight at any altitude and any formation, so Springfield 1 will.

Remember the only 2 rules:

- HARD DECK LIMIT 100 FT AGL
- NEVER ENTER CONTAINER AIRSPACE

Breaking those rules will consequentially get Showtime to stop the fight.
