

RED FLAG TRAINING MISSIONS

A series of advanced training missions based on Red Flag ranges and rules.

Features:

- custom ATC with working ATIS
- custom Voice Overs
- populated airbases
- simulated Red Flag rules
- custom Mission Data Card on built-in kneeboard

MISSIONS:

Day 0 - Welcome to Nellis!

Enjoy the dusk and land with AWACS Magic 1-1

Day 1 - NTTR Familiarization and daylight formation flying

Follow Springfield 1-1 over NTTR airspace , train formation flying

Day 1 - Night formation flying

Escort tanker during night time until bingo fuel or scheduled guests are done refueling

Day 2 - AAR and BFM training

Try air refueling and then engage Springfield 1 over FEBA guns only!

Day 2 - ACM Training

Engage Aggressors F-16C over FEBA with Sidewinders

Day 2 - ACM Training AGGRESSOR

Your turn as an Aggressor! Engage Blue F-15E over FEBA with Sidewinders, no Tanker or AWACS support this time!

Day 2 - BVR Training

Engage Aggressors F-15C over FEBA with AIM-7s (will add AIM-120s once LTWS is implemented)

Day 3 - Air-Ground Range Training

Train your ground pounding skills against simulated Red tanks with M151 Rockets and Mk82s over Range 62. FAC Bravo 1 will call hits!

Day 3 - Pop-up Attack Training

Try the Pop-up Attack maneuver on a pre-planned target. Use terrain masking to approach the target and avoid the defending SA-6 and AAA. FAC Bravo 1 will call hit. Once pickle go defensive and avoid SAM launch.

Day 3 - JTAC Training

Contact JTAC Axeman for support Bravo planned attack on a Red Logistic Outpost defended by tanks , AAA and an SA-2.

Day 3 - Sead Training

Support Uzi1 and Enfield 1 for a surprise attack on Red Forces. Test yourself in your first package mission!

...many more mission to come!!!

Day 4 - A day over FEBA (long lasting live fire mission against Red Forces)

CUSTOM ATC:

Custom ATC is divided in steps where you simply pass through them by pressing "**SPACEBAR**" everytime you got message to do it.

DEPARTURE

After startup -> Grab ATIS and contact Ground Control

Hold short runway 3R -> contact Tower

After takeoff -> contact Departure

ARRIVAL

When you arrive at the last waypoint (LANDING IP) -> Grab ATIS and select the right information in the F10 menu to contact Approach

around 5nm to Nellis AFB -> contact Tower

After landing -> contact Ground for parking

EMERGENCY ARRIVAL

Emergency -> this will show up after departure clearance, you can select it anytime with F10 menu , if you are in trouble Nellis ATC will let you land immediately, firetrucks will wait you at the end of the runway.
