

# DCS Ka-50 Black Shark 2 VoiceAttack by Bailey v1.0

## Intro

Hello and welcome to Bailey's VoiceAttack Profile for the DCS KA-50! This is the README. Thank you for taking a look-see. Please make sure to configure your key binds to what I have provided in the download files (Keyboard\_Blackshark\_BaileyV1.diff.lua). It is up to you to make sure you have the most amount of fun with this profile. Import those keybinds! With just less than 1,000 unique commands, the sky is the limit. Use as many or as little as you like.

## How to Install

1. Extract the file you downloaded with your personal flavor of zip software (winzip, winrar, etc.).
2. Open Voice Attack and Import the file called 'Bailey Ka-50 Blackshark2 vX.vax'. The 'X' denotes the version numbers. The higher the number, the more recent the version.
3. Open DCS and go to the Control menu.
4. Ensure that you are in the "Ka-50 Sim" bindings (check the top left dropdown menu).
5. Click any box in the Keyboard column.
6. Click "Load Profile" in the upper right of the menu.
7. Navigate to and select the file called 'Keyboard\_Blackshark\_BaileyV1.diff.lua' that was in the download, then press OK.
8. Yay! You did it!

## How to understand VoiceAttack and this VA Profile

To get the full benefit and understanding of this VAP, you will need to know how commands are written in VoiceAttack. Please search for and read the "Dynamic command sections" in the VoiceAttack readme. Sure, you can use this profile without having read it, but you will get so much more out of it if you do! From this point forward, I will assume you have read the page or two of information about dynamic command sections. If you want to use this VAP with another VAP, take a look at "Global Profiles" in the readme too.

## Crew Chief Commands

These commands can be used on the ground while at a friendly airport.

"chief, change HMD"

"chief, give me the HMS"

"chief, give me the NVGs"

"chief, request repair"

"chief, rearm and refuel"

"chief, use regular launch"

"chief, use the turbo gear"

"chief, turn off the ground power"

"chief, turn on the ground power"

## Radio Commands

This profile features automatic radio tuning. You will have to reset it each time you get in the just, but its easy.

1. Say "Reset Blackshark radios"
2. Follow the prompts (frequency 124.000 and channel 1 are the default spawn settings).
3. Done!

Here are some examples of commands that you can use to tune the radio.

"radio channel [1..10]"

"radio frequency 123 point 250"

"radio frequency 246 point zero"

VoiceAttack does not know what your DCS radios are tuned to. It keeps track of what it *should* be. If you ever find the need to reset the radios in flight, you can use the "quick reset blackshark radios" command after tuning the radio to frequency 100.000 and channel 1.

The KA-50 can use only 1 radio at a time. Use the command "next radio" to cycle them.

You can also say "F [1..12]" to use the F Menu to talk to AI, for example.

Say "Comms" to bring up the DCS comm menu.

## Press Commands

You have the ability to manipulate push buttons around the cockpit for your ease of use.

Use these commands to do so:

"Press [0..9]" -For the nav console

"Press enter"

"Press cancel"

"Press CMD [1..6]" -For the countermeasures buttons

"Press d link [1..9]" -For the datalink buttons

"Press [airfield; fix point; range to target; UNU norm; INU reset; INIT point; plus; minus; nav target]"

"Press [range to waypoint; waypoint; wind; speed; self; true heading; waypoint]"

"Press A [1..5]" -For the ABRIS. A for ABRIS :)

## Kneeboard Commands

Use these commands to, well, command the kneeboard.

"Show/hide kneeboard"

"kneeboard toggle"

"kneeboard next/previous"

"next/previous page"

"kneeboard mark"

"kneeboard where are we"

## Cockpit Commands

For your ease of use, I have made some Cockpit commands. Look into the VA profile to see more and feel free to add more of your own! You can also export the .vap to .html and make your own list. See the VA readme for more info.

ADF [next; previous] channel	air to air mode	air to ground mode
anti-collision light toggle	auto turn toggle	automatic gunsight toggle
autopilot altitude toggle	autopilot bank toggle	autopilot baro toggle
autopilot [DH;DT] toggle	autopilot director toggle	autopilot heading toggle
autopilot off now	autopilot pitch toggle	cannon rate toggle
cannot type toggle	comms	descent mode
engine anti-ice toggle	fence in; ready attack	fence out
fire [green; red] flare	fire [white; yellow] flare	fire all of the flares
flare toggle	flare side toggle	formation lights toggle
show frame rate	gear toggle; gear [up; down]	moving target toggle
HMS toggle	hover toggle	HSI toggle

master mode [left; right]	nav light code mode	nav mode; weapon reset
nav master power toggle	open chicks guide	[open; close] door
panel lights toggle	pilot body toggle	hud filter toggle
rotor de-ice toggle	rotor rpm silence	rotor lights toggle
select all stations	select gun	select [inner; outer] stations
tv frame bigger; tv target big	tv fram smaller; tv target small	tv zoom [in; out]
[show; hide] score	target lock; lock target	warning silence
stop flare	flare flare flare	tv center
tv uncage	weapon mode [manual;auto;toggle;]	windshield wiper toggle

## Macro Commands

This Profile contains every single DCS KA-50 action Eagle Dynamics has to offer as a Voice Attack Command. This gives you the ability to make commands and macros of your own. The possibilities are nearly limitless. Make sure to read the Voice Attack Readme so that you can use your time wisely and get ahead of the curve. Use your imagination! Here are some that I made up. You can do it too!

“datalink [vehicle; sam; other; ingress point] to wingman [1..4]”

“bombs away”

## Outro

That's about it for now. For those savvy Voice Attackers, there are some treats for you in the .vap. For those who aren't as savvy, there is something you can look forward to! Thank you all for downloading my VoiceAttack profile and I am sure we all look forward to what the DCS KA-50 will have in store for all of us! Feel free to contact me on the ED forums (Bailey) or better yet on Discord (Bailey#6230). Remember that comments, questions, critiques, and requests are always welcome!

~Bailey
