AIRFIELDS

35. UNFIL FUTURE AIRFIELD

DISCLAIMER & ACKNOWLEDGEMENTS

- I am not a military pilot. I'm a VFR pilot, so my knowledge of some of the systems referenced is limited.
- This document is based off my own review of the represented theatre plus open source documents on the airfields
- Graphics are largely my own design. Exceptions may exist and are credited where known.
- This document is intended for sim use only, It is a rough representation of an en route chart designed to provide bearing distance and height information in a format that should look familiar to a pilot
- Given the complexities of the map I have removed some of the heliports for space considerations. I have also drawn logical routes on the map as due to the hostility in the region the actual routes are limited and most of the modelled airfields are not represented.
- Where an airfield exists in real life, but is only modelled as nav aids I have coloured it grey and added a light blue circle
- This document is designed to be printed at A3, a version has been added to my airfield diagrams, but is fairly hard to read due to the size of the fonts involved.
- If your squadron is using this out of their original format/naming, please contact me on the forums and let me know. I don't mind but do like to keep a vague track of where my work is.
- Any errors can be reported through the forums. This is a large effort to complete so I don't pretend they are 100% accurate.

Please enjoy, CombatWombat FEB 2021
