NOTE: Due bug in DCSW, AI report passing WP one ahead of actual. AI reporting "Passing WP3" is at WP2.

SITUATION: Sigint and Humint sources confirm that Iran is covertly enriching uranium to weapons-grade material in defiance of UN resolutions; and the United States has deployed Carrier Task Group 3 to the northern Indian Ocean to conduct naval exercises in a show of force. Armed Iranian speedboats have been harassing US Navy ships with hit and run feints; however earlier today, during one of those incursions, gunfire erupted. Assured that the Iranians fired first, POTUS has authorized a strike on the Iranian Navy small boat facility near Bostanu, Iran, believed to be the home port of the Iranian boat attackers. CTG3 operations has planned a surprise night attack.

TASK: Primary – You will lead a flight of 4xF/A-18C, launching from USS Stennis at 0500 and feint towards Al Minhad AB, UAE. At Al Minhad WP4 descend to 200 FT and fly NOE and EMCON to the target. Stealth is essential for mission success. Maintain ingress ceiling of 280 ft. AGL to avoid detection by Iranian EWR. Pop up at 10 NM to target and destroy the boats and support facilities. Estimated safe time over target is 5 minutes before the Iranians can activate local air defenses. JTAC, Raider 1, will monitor target area for enemy alert level and provide GO or NO GO message about 0524 and final message about 0528 near IP. Carrier CAP Enfield 3, 2xF-14D can support if needed.

THREATS: Iran is known to have Russian SA-11 units operational; however their location is unknown. AAA, Iranian MiG-29A and MiG-21 fighter patrols.
