

Greetings Herc Drivers.

Enclosed is my C-130J-30 checklist for the Anibus Hercules Mod.

I have blended real world and DCS World procedures to allow you to maximize your C-130 flight operations to maximum effect.

The PDF can be used on popular tablets or a second monitor.

I have included kneeboard pages as well.

Place the unzipped "cockpit" folder in your .../Saved Games/DCS OpenBeta/Mods/Aircraft/Hercules folder. It will not overwrite any existing pages located within the Kneeboard/Pages folder. You may always delete or backup any existing pages located there if you wish.

Use the **left bracket [** key to travel backwards to the first page of the kneeboard checklist. You may wish to use the new kneeboard pin feature to place colored tabs on specific checklist pages. Realize that these will not be saved after mission restart.

An excellent Lockheed Martin C-130J Pocket Guide is also available here:

<https://www.lockheedmartin.com/content/dam/lockheed-martin/aero/documents/C-130J/C130JPocketGuide.pdf>

It is a great C-130J informational resource. Pages 22-24 have a nice Flight Station layout diagram for your C-130J cockpit familiarization needs.

I hope you enjoy using the checklist. I will release updates as time permits and user demand warrants.

May every drop you have be a "P.I."; and fair winds, high per diem and safe travels to you in 2021!

Cheers,

Backy 51
