QNH:	29.90			2000m 28°, 1 m/s

### Situation

Today, the enemy is in complete disarray and unable to muster much of a defense. They scattered into the countryside as they attempt blending in with the locals whenever possible. Lieutenant Colonel Nolan's committed your unit to CAS today. Allied forces are out there looking for insurgents and when they find them will reach out to you for assistance.

### **Blue Task**

Get yourselves started and checked in with our overwatch commander who will give you instructions on where you're needed. If this afternoon is anything like the past few days, the Iranians stand down at dusk. We haven't seen much action from them once the sun goes down. Good luck, Griffins. I'll see you back here before sunset at 1800

MISSION: Close Air Support
