

OPERATION HIDDEN SCIMITAR

By BOGEY DOPE

SITUATION

Mossad has acquired intelligence that a terrorist group, lead by Yazid El Sharqeya and Dr. Jakeem Badawi, called "The People's Sword," plan to execute a VX chemical weapons attack in Jerusalem. A Mossad operative who has infiltrated the group as a low level chemical weapons tech was able confirm this. They're producing and storing the VX Nerve Agent in a warehouse building at their compound in the middle of the Syrian desert. His report states that they've been slowly acquiring everything they need to manufacture it. The good news is, he's been able to confirm they haven't been able to actually make VX yet. They've been able to make the base, but they still require Isopropyl Aminoethylmethyl Phosphonite, NATO Designation "Agent QL". The CIA has confirmed, that a shipment of Agent QL from an unknown source in Iran, has just arrived at Damascus International, and is leaving via convoy headed to "The People's Sword" compound in the middle of the Syrian Desert. Our intel suggests Jerusalem is only their first target. We are unsure of their next move after that.

Once this shipment of Agent QL arrives, Yazid and Badawi plan to begin full production as soon as possible. We need to make sure this shipment never makes it to that compound. The cherry on top would be the destruction of that warehouse as well, but isn't as high priority.

Though the Syrian Government wouldn't mind the neutralization of this group, they also wouldn't take too kindly to Israeli F-16's flying into their airspace either. This will require a great deal of caution, as we really don't want to start a war with Syria at the moment, but the current Israeli leadership also doesn't want to risk allowing this to even begin to take the shape of an actual VX attack in Jerusalem.

Currently, we have a JTAC attached to a Mossad and CIA task force out there in the Syrian desert (Code Name Tripwire). They will be contacting you on 271.50 when the convoy is at least 30 miles away from the City of Damascus. We want as little attention to this as possible. We plan to run a hidden strike deep inside Syria without the Syrian military knowing we were ever there.

TASK FORCE SABER

MISSION BRIEF

SABER 1

You are tasked with the acquisition and destruction of the convoy. You will take off at 1745 and proceed east through Jordanian airspace to the FUP over H4 in Northern Jordan. Stay south of the Syrian border until you have been given the execution order. Follow the waypoints we've provided. We've already cleared this with the Jordanian Airforce. You will check in with Tripwire on 271.50 once you're on station over H4 (Waypoint 3). Orbit there until tripwire gives the execution order (RAMBO). Once execution order Rambo has been given, Trip Wire will provide you with coordinates to the convoy's location. Once you have these, you will descend to below 500ft AGL and pass through the southern Syrian border. Head toward the coordinates provided to you by tripwire. Once you are 10 miles out from the target location, you will call Saber 2 and give the go-ahead to run in on the compound. Be advised, we have reason to believe the convoy will be protected by a mobile AAA. These guys are crafty and will throw any gun they can fit in a toyota hilux bed so keep an eye out. Stay below the radar deck until you have the target in site. We are asking that you get in, destroy the convoy, and get out without being detected by Syrian Radar. **Priority are the three trucks carrying Agent QL.** Once they are destroyed, do an about face and burn your tails back to Jordanian Airspace and RTB asap.

NOTES:

We don't want a war with Syria if at all possible. **Do not fire on Syrian military unless absolutely necessary.**

You will not have tanker support in Jordan, so you will need to conserve your fuel as you fly out.

SABER 2

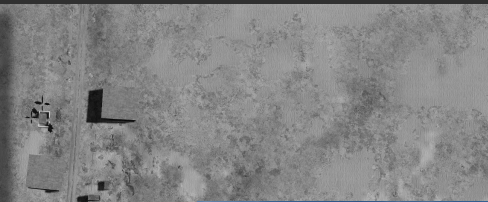

You are tasked with the destruction of the warehouse at "The People's Sword's" compound. You are weapons free on the entire compound, but *priority one is that warehouse*. We don't want to see so much as a bolt left of that building when you're done. Be advised, Mossad's man on the ground has reported that they have MANPAD systems in their possession. He is going to attempt to sabotage these so they don't function, but we need to plan for every possibility. Be sure you're popping flares as you're on your final run in, and poppin them when you're egressing out. You will take off at 1755 and head east through Jordanian Airspace. Stay south of the Syrian border at all times until you have been given authorization by Saber 1 to go in. You will check-in with "Tripwire" when you are on station over H4. Once Saber 1 is 10 miles from the convoy, Saber 1 will give you the green light to run in hot on the compound. Once the order has been given, you will descend to below 500ft AGL and pass through the southern Syrian border and head toward the compound "Waypoint 4". Mossad has been able to give us impeccable details on this compound up to and including exact GPS coordinates of the warehouse itself. Although, visual confirmation with your targeting pods would be a good triple check. Once in range, you will pop up and drop two 2,000lb JDAMS on that warehouse. Once the warehouse is destroyed, you will do an about face and burn tail back to Jordanian airspace and RTB ASAP.

WAREHOUSE GPS COORDINATES: N33 15.695 E037 48.796 – 2107ft

NOTES:

We don't want a war with Syria if at all possible. *Do not fire on Syrian military unless absolutely necessary.*

You will not have tanker support in Jordan, so you will need to conserve your fuel as you fly out.
